

UTOPIA EAR PADS

Product Data Sheet

The ear cushions are made of 50% genuine leather and 50% acoustic fabric. These true lambskin ear pads enhance your headphones listening comfort. This design gives the headphones an ideal balance between absorption and diffusion. Moreover, the perforations on the leather are intended to adjust the diffusion efficiently while providing a linear register in the 1 - 10kHz frequency range. Finally, the high-resilience memory foam ear cushions provide maximum comfort.

Available as an accessory, they are compatible with the Focal's Utopia and Elear headphones.

Key features

- High-resilience memory foam ear cushions for maximum comfort.
- Easy to put on and remove thanks to the 5 attachment points.
- Poron foam®: soundproof joining of the ear cushion to the baffle.
